

Embedded Artistry README Template

30 NOVEMBER 2017 BY PHILLIP JOHNSTON • LAST UPDATED 24 AUGUST 2021

I previously shared tips for writing a better README. Now I'd like to share our README template with you.

This template is probably much more involved than other README files that you have seen. This template is meant for developers who are committed to a standard of excellence and want to provide quality documentation for their projects. Our goal is to anticipate users' questions before they encounter them and make our documentation as comprehensive as possible. By putting effort into your documentation, you make it much easier for other developers to use and contribute to your projects.

You can always find this README template (and more!) in the [embeddedartistry/templates GitHub repository](#).

README Template (Markdown)

```
# Project Title
```

```
Provide an introductory paragraph, describing:
```

- * What your project does
- * Why people should consider using your project
- * Link to project home page

```
## Table of Contents
```

1. [About the Project](#about-the-project)
1. [Project Status](#project-status)
1. [Getting Started](#getting-started)
 1. [Dependencies](#dependencies)

- 1. [Building] (#building)
- 2. [Running Tests] (#running-tests)
 - 1. [Other Tests] (#other-tests)
- 1. [Installation] (#installation)
- 1. [Usage] (#usage)
- 1. [Release Process] (#release-process)
 - 1. [Versioning] (#versioning)
 - 1. [Payload] (#payload)
- 1. [How to Get Help] (#how-to-get-help)
- 1. [Contributing] (#contributing)
- 1. [Further Reading] (#further-reading)
- 1. [License] (#license)
- 1. [Authors] (#authors)
- 1. [Acknowledgments] (#acknowledgements)

About the Project

Here you can provide more details about the project

- * What features does your project provide?
- * Short motivation for the project? (Don't be too long winded)
- * Links to the project site

...

Show some example code to describe what your project does

Show some of your APIs

...

[Back to top] (#table-of-contents)

Project Status

Show the build status if you have a CI server:

[![Build Status] (http://your-server:12345/job/badge/icon)] (http://your-server:12345/job/)

Describe the current release and any notes about the current state of the project
